Chops Saute.

Heat two tablespoonfuls of butter, add seasoned chops. Brown on both sides pour the butter over and serve.

On bread-making day take a quart of very light wheaten bread-dough, just before the loaves are put into the oven. Lay it in an earthen pan and mix in. gradually and alternately, three well of us? Still it might have its disadvanbeaten eggs, a half pint of powdered white sugar, haif pint of rich milk or to the door who are not especially welcream, half pound of fresh butter and come. one teaspoonful of mixed spice, powdered mace, nutmeg ar thoroughly, beating and stirring it well. Sprinkle some flour on your pasteboard and form the dough into small, round cakes. Having pricked the tops with a fork, lay them in a buttered pan, meats, or any other relishing vians, an-

This cake will be improved by the addition of some well-washed and then dried currants and raisins. Thes should be well dredged with flour to prevent their sinking.

Mutton Broth. Put three pounds of mutton in a pot with two onlons and three quarts of Simmer two hours. Strain, add water. a little barley, three turnips, three potatoes, all cut up. Simmer one-half hour skim, add minced parsley, and serve.

Black Eyes Are Healthy.

It is said that the health of the bru nette type of eye is, as a rule, superior to that of a blonde eye. Black eyes usually indicate good powers of physical endurance. Dark blue eyes are most con mon in persons of delicate refined or effeminate natures, and generally show weak health. Light blue and much more gray eyes are most common in the hardy and active. With regard to dis eases of the eye, brown or dark colored are weaker or more susceptible of in fury, from various causes, than gray or blue eyes. Light blue eyes are gener ally the most powerful, and next to those are gray. The lighter the pupil the greater and longer continued is the degree of tension the eye can sustain. The majority of first-class shots are men whose eyes are either blue or gray

As July is pre-eminently the camper's English papers say that, since the anmount, a few hints may be of value
Thirteen yards, twenty seven-inch taffeta. Duke of York to the Princess May, the the woods. beat the whites of the eggs carbonate of soda as will lie on a six-

a cream-like mead on the top. Racin and Oysters,

Brown one ounce of bacon cut up. Add one quart of oysters; cook three minutes; add pepper.

Ginger Beer.

This is best if made in the evening and bottled next morning. Squeeze lemon and keen the juice, throw the peel into a two-gallon pan, with one pound of sugar loaf, and one and a quarter ounces of sliced ginger, pour over them one gallon of boiling water; when lukewarm put in the lemon juice and mix a teaspoonful of German yeast with a little of the fluid until it is like cream; stir in the pan, cover and leave till morning. Then take out the lemon peel and ginger, skim off the froth, and bottle in half-pint stone bottles, and tie the corks down with twine. It will be ready in forty-eight hours.

Beeen and Lamb.

Chop together four pounds of lamb, one pound of bacon; add pepper, grated rind of lemon, one minced shallot and a little thyme. Make in rell, cover with buttered paper, that with rough paste. Bake two hours, take off both covers and serve with peas.

Keeping Fruit and Vegetables. It is surely of as much consequence

to know how to keep fruits and vegetables as it is to know how to produce them, and yearly more and more thought and attention are bestowed on the subject of their preservation. It appears that experiments in France have shown that fuits and vegetables stored under rdinary conditions, but heavily dusted with lime, will resist decay for a long time. Potatoes layered in lime kept for fourteen months and were in as good condition as when dug. Beets, onlons, apples, grapes and quinces similarly treated kept well for varying periods, but all for several months longer than they would have done ordinarily. The lime keeps away moisture, prevents the fruit from absorbing unpleasant odors, and destoys any microbes that may have found a resting place upon the skin or about the stem. This is a preventative within reach of all, and much cheaper than cold storage.

Bacon and Veal.

Fry bacon. Cut veal thin and fry in fat. Strew with crumbs, brown them

To Keep Roses in the Bud.

If, for any reason, one wishes to keep back rosebuds, they must first have their stems placed in cool water, then the buds themselves sprinkled with the same, after which they must be set in a dark, cool room-the cellar is best. With this reatment the opening process will not advance perceptibly for several days.

A fashion among artistic people is the hanging upon the inside of the door a welcoming harp or orchal harmonical With every movement of the door small metal balls hung upon wires strike the strings of the sounding board, sending forth faint, sweet music. Why might not this bit of beauty be achieved by more tages as to the host of people who come

Ham Tonat. Scrape or pound some cold ham, mix it with beaten egg, season with pepper, lay it on buttered toast, and place it in hot oven for three or four minutes. Dried salmon, smoked tongue, potted

swer equally well upon toast.

This costume for a miss is of white taffets with plaitings of chiffon on skirt and waist

Lashian Drift. Red is used as much as ever for sea-

After the attempt to harmoniously
